# Imagine Learning Programs are coming home!

Your child can now use all of the same Imagine Learning programs that they presently have access to at their school at home! These programs may include Imagine Language & Literacy, Imagine Math 3-8, Imagine Math PreK-6 (PreK-2 is formerly Blueprint.), Imagine Math Facts, Imagine Español, and/or Imagine Reading (3-6). Only the programs they are using during the school year will appear on their Davis School District Clever dashboard after they have logged into Clever.
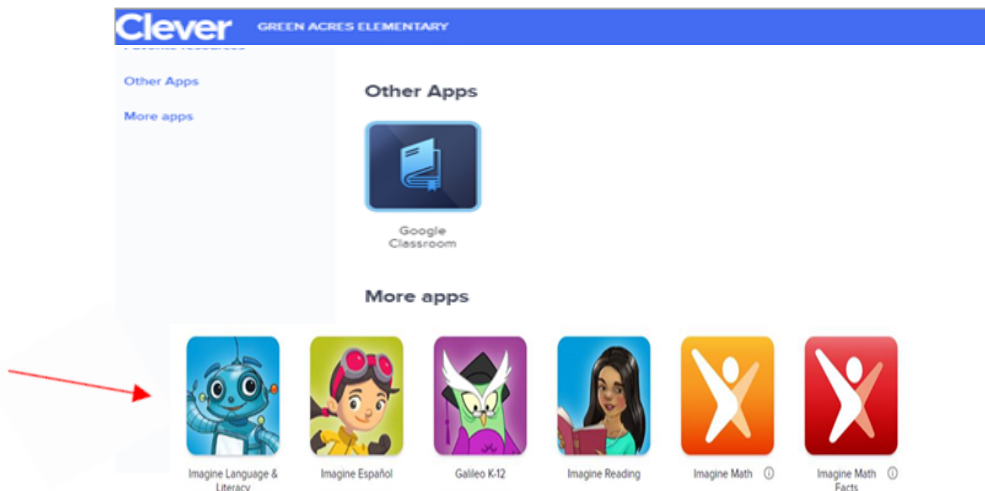

Home access is possible PCs, Macs, iPads, Chromebooks, Kindle Fires, and Android or Windows tablets. Programs are not meant to run on cell phones due to the small size of the device screen. For Imagine Language & Literacy, students must have access to a microphone to record their reading. Students should work independently on the programs so that the programs can scaffold up or down based on their learning needs.

For information on system requirements go to **support.imaginelearning.com**. Click on **Imagine Language & Literacy, Imagine Math PreK-2 or Imagine Math 3+, Imagine Math Facts, or Imagine Reading,** and **Support topics.** Then, choose **System requirements** for more information.

- Using Chrome, go to **https://clever.com/in/dsdclever.** It is recommended to Students will log in through Clever using their Mircosoft Office 365 district email and password or a Clever badge provided by their teacher. Clever badges can only be used with devices with cameras. (These badges also only operate on iPads with IOS 11 or higher.) I

- After logging into Clever, students will see their Clever dashboard. They select the program they wish to use. (Some programs are grade-level specific and may not appear on the dashboard.) On an iPad, the Imagine Language & Literacy app or the Imagine Math Facts app will need to be downloaded to run the program, but they will still log in through Clever through a browser. On other devices, it is recommended to use a Google Browser to launch Clever.

Please remember to allow students to work independently on the Imagine Learning programs to allow the programs to provide the support needed to help your student show progress.
